- Lifetime frame warranty

* Warranties shown are for home use. For commercial use, please see warranty card.

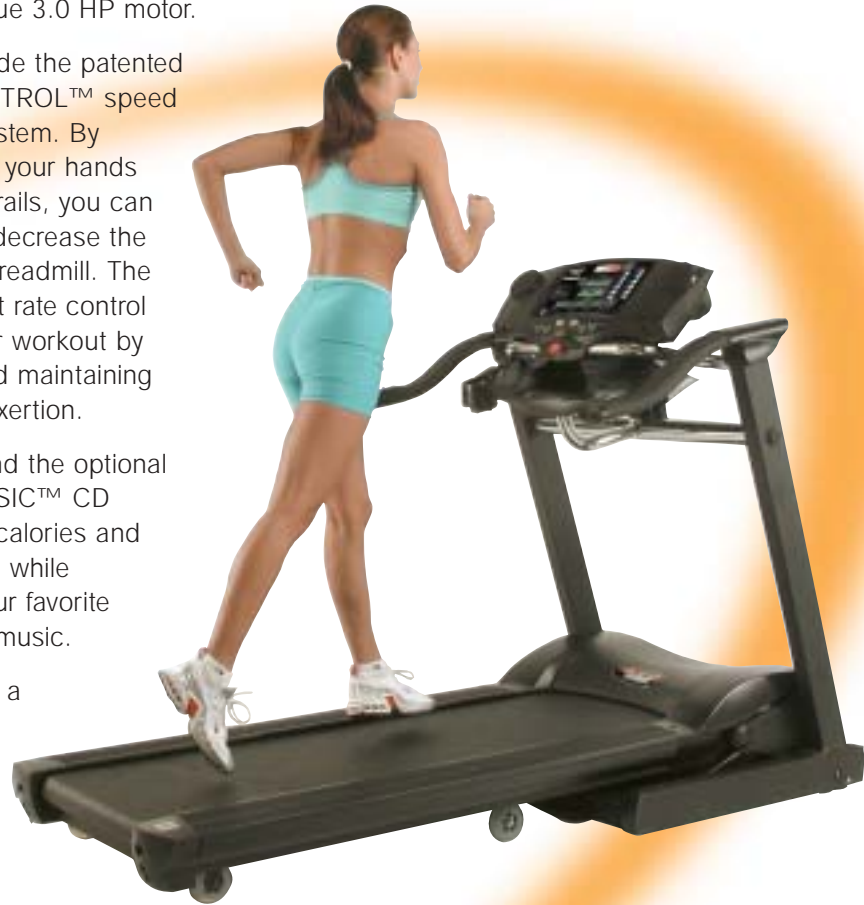

Power, Performance & Style

Warranted for light commercial or home use, the EVO 3CD is built like a tank, but has the style of a Harley. The heavy-duty 304 lb. welded unibody steel frame provides a stable and solid feel. It comes with an extra long 20"x62" belt (running/walking surface) and is driven by a high torque 3.0 HP motor.

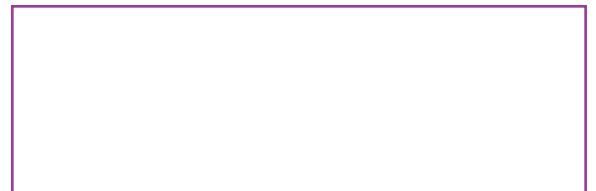

Features include the patented MOTION CONTROL™ speed adjustment system. By simply waving your hands over the handrails, you can increase and decrease the speed of the treadmill. The standard heart rate control optimizes your workout by monitoring and maintaining your level of exertion.

We recommend the optional SMOOTH MUSIC™ CD system. Burn calories and get into shape while listening to your favorite CD and MP3 music.

These are just a few of the exceptional features that come with the EVO 3CD.

CONSOLE SHOWN WITH OPTIONAL SMOOTH MUSIC™ STATION.

EVO 3CD

Control the speed of your treadmill with the wave of your hand.

The EVO 3CD has the new patented MOTION CONTROL™ feature.

By simply waving or holding your hands over the siderails you can increase or decrease the speed. This avoids the off balance and awkward experience of changing the speed by pressing a button on the console. You can also stop the treadmill by holding both hands over the siderails.

We make exercise a pleasure.

Built like a tank with the style of a Harley.

With a heavy duty unibody steel frame, and chrome tubing on the crossbar and console supports, the EVO 3CD is built to take a pounding in style.
